Electrolux PROFESSIONAL **WE2-9P** myPRO Edge Professional Washer with Drain Pump

ENERGY A

kiwa CERTIFIED KUKreg4 ATS 3

Product Highlights

Power supply: 13 amp plug

Washer capacity: 9kg

Dimensions: W597 x D619 x H850mm

Maximum spin speed: 1400 RPM *(536 G-factor)*

Programmes: 16 *(including Eco 40-60, Synthetics, Rinse & Spin, Cotton, Disinfection, and Microfibres)*

Energy usage at full load: 0.7 kWh per cycle*

Water usage at full load: 68 Litres per cycle*

Water supply: Hot and cold water connection

Tested lifespan: 15,000 hours / 7,500 cycles
(Electrolux R&D Accelerated Endurance Testing)

Warranty: 2 Years Parts and Labour
(or a usage cap of up to 3,000 cycles)

Water Regulation Compliant: KIWA Fluid Cat 5

Outstanding Durability: Engineered for repeated daily demand, myPRO Edge offers up to three times the lifespan of standard domestic machines. It undergoes rigorous testing for 7,500 cycles or 15,500 hours of professional use. The robust build features a corrosion-proof exterior alongside a durable stainless-steel top and front panel. This commercial warranty provides vital peace of mind for business owners.

Faster Processes: This washer delivers up to 50% faster cycles to help keep daily operations running at highly efficient turnaround speeds. A standard Cotton 60°C programme completes in exactly 82 minutes using a cold water supply. Utilising the pre-installed hot water inlet cuts heating times and reduces cycle duration by an additional 17 minutes. The Class A energy efficient washer handles 9kg loads.

Tailored for **light-duty** commercial use, the WE2-9P serves as the perfect solution for a wide range of small businesses:

Hotels, B&B's, Camp Sites, Holiday Parks, Sports & Fitness Clubs, Restaurants, Cafés, Salons, Student Halls, & Care Homes.

Main Features	
GTIN number	
Load capacity	9kg
Drum volume	70 Litres
Maximum spin speed	1400 RPM *(536 G-factor)*
Programmes	16
Exterior finish	Stainless Steel
Drum material/type	Stainless Steel
User interface	LCD
Panel language	Symbol / English
Water supply	Hot and cold fill
Draining system	Drain pump
Plug type	UK 13 amp plug
Usage cap	3,000 cycles
Tested lifespan	15,000 hrs / 7,500 cycles
Stacking kit with shelf	N1WYHSK1 *(Sold separately)*

Technical & Performance Features	
Gross weight	80.5kg
Net weight	82kg
Product dimensions (mm)	W597 x D619 x H850
Packed dimensions (mm)	W640 x D710 x H900
Wattage/Voltage	2100W / 220-240V
Frequency	50/60 Hz
Energy usage at full load	0.7 kWh per cycle*
Water usage at full load	68 Litres per cycle*
Wash duration at full load	75 minutes per cycle*
Wash & spin noise levels	51 dBA / 75 dBA
Energy efficiency class	A
Detergent compartments	3
Drum light	Yes
Levelling feet	4 *(Adjustable by 15mm)*
Payment system	Optional *(Get in touch)*

Flexibility, Hygiene & Water Safety: Sixteen programmes and six functions handle specialist business loads, including fitness towels and mops. A dedicated disinfection cycle offers maximum bacteria removal, while solenoid-controlled water inlets and a verified Type AB air gap provide certified KIWA Fluid Category 5 backflow protection for UK regulatory compliance. The ProSteam Boost function cuts wrinkles in 15 to 25 mins, and the stainless-steel face ensures easy cleaning.

Trouble-Free Operation: Equipped with a standard drain pump and simple 13A plug, this model avoids expensive electrician hard-wiring required by Asko, ensuring zero setup costs. Engineered for smooth operations, its shock-absorption system minimises vibrations to keep noise levels below 50dB during washing cycles. Ergonomic features like a clear interface ensure a seamless daily workflow.

Speed Soak Drum: The myPRO Speed Soak Drum features 4.5mm perforations that allow water to saturate the load faster. It drains completely to significantly reduce subsequent drying times and lower energy consumption. Dirt and particles are thoroughly washed out rather than trapped to ensure pristine results. This smart drum design reduces abrasion so all business textiles feel good for longer.
